LOW MAINTENANCE

INSTANT RELIEF FROM THE SUN

## Retractable Awnings Allow You to Enjoy Outdoor Living with Indoor Comfort

Retractable awnings are one of the best investments you can make to get more comfort and enjoyment from your home. Retractable awnings, from Shade & Shutter Systems, are designed for ease-of-use and care-free living. Stainless steel hardware, corrosion resistant powder-coated frames, self cleaning fabrics and custom installations are standard features.

## Motorize Your Retractable Awning

Effortlessly extend or retract your awning with the simple touch of a button. You can conveniently control your awning from up to 65 ft. away. With our state-of-the-art sensors automatically control your awning to maximize energy savings and protect your entire system.

## K300 FULL CASSETTE

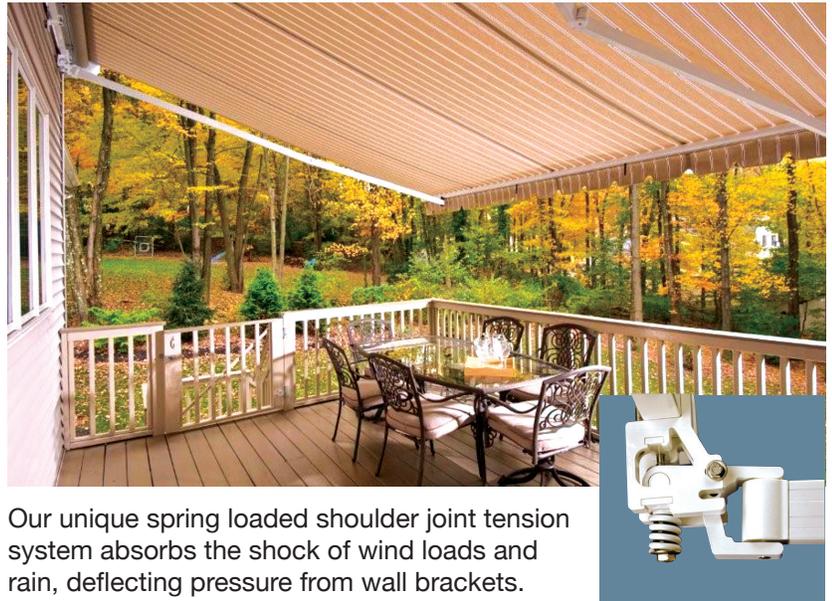

The K300 Retractable Awning is the perfect solution for installation with limited mounting space. The combination of its compact, state of the art design, and it's elegant fully enclosed cassette define the phrase "Where Fashion Meets Function". Double wall extrusions and drop forged arm components make this awning strong and beautiful. The K300 won't require any winterization and protects your fabric from the elements.

The K300 Retractable Awning tucks away into its fully cassetted hood when not in use.

## Toff SolarShield HIGH WIND

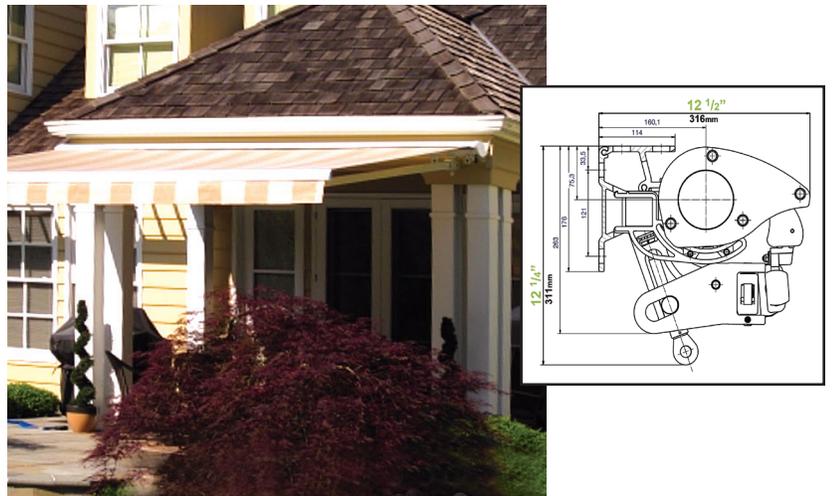

The SolarShield Retractable Awning is the only retractable lateral arm awning with a spring-loaded shoulder — designed to withstand the impact of strong winds, heavy rains, and intense storms. The strength and durability of the SolarShield reduces impact on both the awning and your home. SolarShields come with manual and electronic retraction options, all of which are made from stainless steel hardware and cables. The three-to-one bevel gear makes for smooth manual operation and light and durable aluminum frames are easy to manage by either hand or motor.

Our unique spring loaded shoulder joint tension system absorbs the shock of wind loads and rain, deflecting pressure from wall brackets.

## Royal SEMI-CASSETTE

The Royal Cassette motorized awning is the most compact looking awning system produced anywhere. The Royal is an in-line system, meaning the mounting, round tube and front profile are all in-line. This semi-cassette completely encloses the fabric when retracted providing increased protection for the fabric and mechanism. The rear mounting bar in this semi-cassette awning provides the advantage of being able to mount the installation brackets where they are needed, with no limitations.

About

### Shade & Shutter Systems

For thirty years, Shade & Shutter Systems has been providing design, installation and have earned the highest quality reputation for integrity and service, providing solutions in coastal communities throughout the northeast U.S.
